Overview

Founded in 1983, originally as Engineering and Professional Services Incorporated, we proudly stand today identified as EPS Corporation built on a foundation of integrity and reliability and is dedicated to providing the best in professional services in support of the federal government, its military and civilian agencies worldwide including the austere environments of Bosnia, Kosovo, Iraq and Afghanistan. EPS is a Service Disabled Veteran Owned Small Business (SDVOSB) and verified as such by the Center for Veterans Enterprise (CVE).

We are a synergistic corporation, privately owned with headquarters in Tinton Falls, NJ, comprised of individual business units strategically located around the world specializing in and managing complementary core competencies. Throughout the business units, we employ more than 600 employees, of which over 50 percent hold clearances at various levels.

Mission Statement

EPS is a global systems integrator providing diverse, cost effective, high quality, integrated products and services to both governments and commercial entities. EPS' mission is to exceed customer expectations while remaining price sensitive, and without sacrificing quality. EPS is firmly committed to upholding our customer partnerships to the highest standards by being knowledgeable of our customers' missions and always providing added-value to our customers' performance.

Vision and Values

EPS Corporation is committed to providing diverse, cost effective, high quality contract services to our customers, and meeting and exceeding expectations as set forth in our contractual obligations. We are committed to upholding a reputation of being courteous, knowledgeable and responsible.

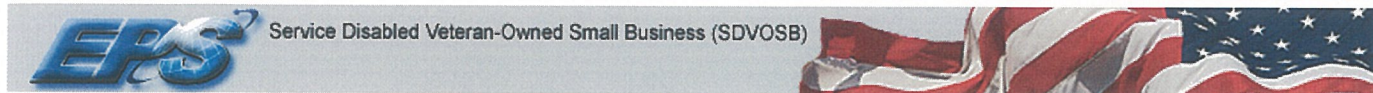

At EPS we value diversity, teamwork, respect and loyalty. We display courtesy and respect to customers, fellow contractors and employees.

Each member of EPS is part of the company's overall success. Every employee is valued their contribution.

Every person stands for quality, teamwork and success.

EPS - where the power is in the people.

[About Us](#)[Business Units](#)[Services](#)[Projects](#)[News](#)[Contracts](#)EPS Corporate Phone
732.747.8277[Overview](#)[Vision and Values](#)[Management Team](#)[Offices](#)[News](#)[Careers](#)[Certifications](#)[Home](#) - [About Us](#) - Certifications**Government Approved Purchasing System**

The successful completion of our Contractor Purchasing System Review (CPSR) signifies EPS as an established government contractor implementing a purchasing system approved by the Defense Contract Management Agency (DCMA) for all Federal and commercial contracts. The DCMA-approved purchasing system limits the government's contracting risk – particularly for Government-wide Acquisition Contracts (GWACs), Multiple Award Contracts (MACs) and other procurements where significant subcontracting is required. Additionally, advanced Government authorization is not required when awarding subcontracts on existing Federal contracts, thereby enhancing EPS' efficiency, timeliness and position as a viable and responsive Service Disabled Veteran Owned Small Business.

Quality Management System (QMS)– International Organization for Standardization, ISO 9001:2008 Certified

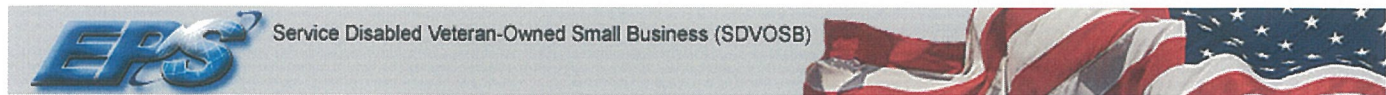

ISO 9001:2008 certification identifies EPS as a business committed to providing quality services and solutions to our customers through the implementation of an approved Quality Management System (QMS). Quality is a top-down driven objective. Our Quality Manual, QMS, and Quality Policy work together to ensure that our customers receive quality services and solutions the first time, and every time. The paramount importance of quality is stressed at every level to ensure that managers, personnel, subcontractors and suppliers understand their responsibility for the quality of their work as well as their compliance with all statutory, regulatory and contractual requirements. EPS strives to rank as the industry leader in quality and reliability, thereby providing customers with maximum return on their investment. Our established procedures govern the performance of all internal activities. We maintain a dedicated, independent team of Quality Assurance (QA) professionals who are trained in project management and the QA discipline; this team of QA professionals provides a check and balance system to independently verify that we follow our quality procedures and processes, and the services are provided in accordance with customer requirements and associated contracts. EPS has been an ISO 9001:2008 certified company since May 2002.

Earned Value Management System (EVMS)

SAP is also the core application supporting EPS' EVMS implementation providing a robust and integrated platform to meet the ANSI/EIA Standard 748-98 guidelines and the DoD 5000.2-R requirements.

EPS' EVMS implementation will support the measured achievement of the cost, schedule, and performance goals of projects requiring EVM. Visibility and transparency throughout the project's life cycle will be achieved through EPS' EVM reporting tools and the SAP application.

Services

EPS is a leader in Enterprise System Integration and offers expertise and comprehensive customer-focused solutions in several domains. The depth of EPS experience covers more than 29 years of planning, assessing, engineering, acquiring, fielding, and supporting global net-centric solutions.

Information Technology/Telecommunications

EPS provides cutting-edge comprehensive Engineer, Furnish, Install, Secure, and Test (EFIS&T) solutions.

Program Management

EPS develops the methodology to effectively implement numerous complex programs concurrently across the globe.

Logistics, Training and Fielding

EPS personnel support the Army Communications-Electronics (CECOM) Life Cycle Management Command (LCMC), Logistics and Readiness Center (LRC) mission requirements.

Integrated Security Systems

EPS offers the design and management of sophisticated systems that integrate all peripheral security devices into one command and control system.

Research and Development

EPS manages Research and Development programs successfully from inception to completion.

Manufacturing and Engineering Marine Vessels

EPS specializes in producing state-of-the-art marine vessels for military, commercial, sport, and recreational use.
