RUBBER COMPONENTS

Rubber Sheets

Range includes rubber liners, wiper rubbers, skirt rubber liners, belt repair cover compounds, abrasion & corrosion protection rubber sheets and general purpose rubber sheets.

Rubber Moulded Components

- Very well equipped rubber moulding unit with latest hydraulic presses.
- We specialise in process plant spares, railway components & material handling spares.

Rubber Lagging

- Hot vulcanising process for lagging of conveyor pulleys and rollers upto 1600 mm dia.
- Specialise in highly abrasion resistant applications.

Rubber Lining

We do rubber lining at our customer site and factory. We undertake rubber lining activities for all kinds of tanks, vessels, pipes and fitting and valves. We undertake rubber lining for

1. Acid Storage Tanks
2. Water Treatment vessels
3. Scrubbers
4. Stacks and ducts, pipes and fittings
5. Triplex Lining
6. Phosphoric Acid Lining
7. De-mineralised water storage tanks
8. Pickling line for steel plants and rolling mills

Rubber lining by both hot vulcanising process and cold bonding process undertaken

The various types of Rubber lining that we handle are

1. Phosphoric Acid Storage Tank
2. Hydrochloric Acid Storage Tank
3. Alkali and Caustic Soda Storage Tank
4. D.M. Water Storage Tank
5. Pressure vessels to DM plants like cation, Anion, Mixed bed & connected pipes and Fittings
6. Scrubbers Stack & Ducts

Material

1. Natural Rubber
 - Soft & Hard
 - Cold & Hot Bonding
2. Synthetic Rubber
 - Nitrile
 - Butyl
 - Neoprene
 - EPDM and
 - Hypalon
3. Triplex Lining
 - Soft + Hard + Soft

RUBBER GASKETS

We can Supply all types of Elastomeric Gaskets such as natural rubber, Neoprene, Nitrile, EPDM, Butyl, Polybutadiene, Silicon, Fluorocarbon, Chlorosulphonated Polyethylene, Styrene Butadiene Rubber etc. These rubber gaskets could be supplied in black and white red colors with or without fabric or metal reinforcements.

Our Rubber Gaskets have been used in petroleum Refineries, Process Industries, Food Processing units etc.
