delair® Means Experience

Since 1936, delair® has focused its business on air & gas drying, filtration and purification, making our company one of the most experienced in the industry.

delair® offers the industry the widest range of custom engineered systems. delair® encompasses all disciplines required to offer a solution oriented product including in-house process design, mechanical & electrical design expertise, as well as instrumentation, manufacturing and the offering of an installation with full service contract and training program.

delair® is able to meet the highest customer, national or international standards on quality and product safety, taken into account the effects on the environment.

A SPX Company

SPX Corporation is a global multi-industry manufacturing leader. The Company is focused on providing solutions that support the expansion of global businesses.

Based in Charlotte, USA, SPX employs more than 17,000 people worldwide in more than 35 countries.

SPX is listed on the New York Stock Exchange under the symbol SPW.

Products

SPX manufactures and markets products for use by customers in a broad range of industries like cooling systems for power plants, power transformers, custom engineered valves, pumps and mixers, Gas dehydration & filtration equipment, diagnostic tools for transmissions system and vehicle maintenance. The industries are divided in four business segments:

- Flow Technology of which delair® / SPX Etten-Leur is a part.
- Test and Measurement
- Thermal Equipment and Services
- Industrial Products and Services

History

SPX was founded in Muskegon, USA in 1911 as The Piston Ring Company. This name was changed in 1931 to Sealed Power Corporation. The current name SPX was adopted in 1988 (See Our History on the [SPX website](#))
